Education

2018-2022 Bachelor's Degree of Computer Science.
Beni Suef University, Faculty of Computers and Artificial Intelligence.
Grade: **B+**
Graduation Project: **ASAR** **(Arabic Manuscript Analysis and Recognition system)**

- It's a mobile and web app connected to a DL model that enables the user to upload an image of an Arabic manuscript, and the model recognizes words and extracts them in a digitally written script.

2022-2023 Pre-Master of Computer Science.
Beni Suef University, Faculty of Computers and Artificial Intelligence.
Grade: **B+**

Experience

Sr. Flutter Developer at **Keld Development** Nov '24 – Present

- I have collaborated with a full team to produce a high-quality product with standard specifications and complex financial details.
- **Real Estate Investment App**
  - It's a real estate investment app (**Android** and **iOS**) under development, I'm not allowed to disclose its details now.
  - I built the entire application.

Flutter Developer at **TechPlace** Nov '22 – OCT '24

- Cooperate with designers to create clean interfaces and simple, intuitive interactions and experiences.
- Learn to search effectively to accomplish tasks that I haven't been exposed to before.
- **GoooBig POS** **(Mobile - Tablet)**
  - It's a **POS and ERP system (offline-first)** for managing commercial activities in Saudi Arabia, and it has many features, the most important of which is that it works locally on a local database, and then it is uploaded to the server at the appropriate time.
  - This app works on **Android** and **iOS** platforms, on all phones and tablets.
  - I built the entire application.
- **DeepIdea** **(Android & iOS)**
  - It's a **Ticketing management system** to help the support employees in companies to manage the tickets of clients.
  - I built the entire application.

Flutter Developer at **CodeCaique** Oct '21 – Nov '22

- Produce high-quality, clean code for client projects, apps such as E-commerce and Qur'an Services.
- **Qimaa (Customer - Salesperson)**
  - Business app for a wholesale company. It consists of two sub-apps.
  - I worked on implementing the UI and linking it to an API of the salesperson app and some parts in the UI of the customer app.
- **Gearshift App (Customer - Washer)**
  - It is a car wash app through which the user requests a person to wash the car, chooses one of those who are suggested from the app, follows the wash, and evaluates the captain at the end.
- **Hawi-هاوي App**
  - App Stores Links (pressed to open):
  - It's an app that is being worked on, through which you can subscribe to real and virtual clubs, follow up on events, book attendance for these events, and other features.

Other Projects

Tanoor Apps (Customer - Store)

- App Stores Links (pressed to open):

  Customer App: **Store App**:

- App to order homemade food from Saudi Arabian families.
- Tanoor Stores app is part of a general Talabat platform, allowing any restaurant or home-based business in Saudi Arabia to easily apply and join through the app.

Aqua Pure App

- App Stores Links (pressed to open):
- Aqua Pure is a smart and easy-to-use mobile app designed for selling and delivering premium water filters, dispensers, and purified water products. With a clean and simple interface, users can browse products, compare features, place orders, and even schedule recurring deliveries. The app also provides timely reminders for filter replacements, special offers, and order tracking, ensuring that customers always enjoy safe and pure water.
- I built the entire application.

App محامي أونلاين

- It is a leading digital platform designed to facilitate access to legal services in Egypt.
- We connect clients with certified, specialized lawyers to handle legal tasks remotely, saving time and effort while ensuring service quality.

Skills

- **Programming languages:** Dart, Python, Java, C and C++.
- **Core Knowledge:** Object-oriented programming (OOP), SOLID Principles, Algorithms, Data structure, Design Patterns, Database and System design and Agile (Scrum) Methodology.
- **Database:** SQL (SQLite) - NoSQL (Hive).
- **Flutter:** State Management (BLoC & Cubit – Advanced, Riverpod – Working Knowledge), Responsive UI & Adaptiveness, Networking (http - dio), Animations, Dependency Injection, Localization, Persistent storage.
- **Real-Time Communication:** WebRTC (Video & Voice Calls), ZegoCloud integration, WebSocket, Socket.IO and Firebase Realtime Database.
- **Hardware & Device Integration:** Thermal Printers Integration (ESC/POS, Bluetooth & Network Printing).
- **App Configuration & Distribution:** Flutter Flavors, Deep Linking & App Links.
- **CI/CD & DevOps:** GitHub Actions, Codemagic, Fastlane.
- **Monitoring & Debugging Tools**: Sentry, Firebase Crashlytics, Firebase Analytics, Flutter DevTools.
- **Tools & Platforms:** VCS (GitHub - Bitbucket), Firebase (FCM – Realtime Database – Firestore – App Distribution), Design tools (Adobe XD - Figma), API testing (Postman – Dash API), Agility tools (Trello, Jira), BI tools (Power BI - Tableau), Payment Gateway integration and Google services integration.
- **Mobile Security:** Frida, Burp Suite, MobSF, Semgrep, Snyk, OWASP MASVS/MASTG.
- **AI Productivity Tools:** Cursor, Google Antigravity, Claude Code,Codex, ChatGPT, Rabbit.
